Dave,

I am communicating with local folks in regards to the Wabuska drain and yesterday our discussions were interesting in that the water release has a change from last year.

Cynthia O.

10301500 WALKER RV NR WABUSKA, NV @ 0813 hrs with a gage height of 3.24 ft and a discharge of 30.8 cfs. Shift of -0.36 ft from previous discharge measurement on Feb 29 was changed to a -0.42 ft shift based on the measurement made on Apr 05. The shift was prorated between measurements. The shift change results of some aquatic growth starting to grow within channel as flows decrease.

Shifts have been updated.

If any questions, please call.
